Partner: HandyBot

HandyBot is a software company that helps its clients implement efficient robots to handle routine computer tasks.

“One aspect of Power Platform I truly appreciate is its accessibility. We don’t need to be tech experts or programmers to grasp and use it.”

— Jana Vasilenková, Managing Director, Accace Czech Republic

- Challenge:** In an industry perceived as old-fashioned, Accace faced time-consuming manual tasks, especially in the accounting and payroll sectors, where communicating with state authorities required daily manual preparation and submission of documents.
- Solution:** After meeting HandyBot, Accace adopted Microsoft Power Platform. It automated many of its tasks, especially in communicating with authorities, and streamlined various processes that traditionally consumed significant team time.
- Impact:** With Power Platform, Accace realized savings in time and resources. The business team's workload decreased by 30% and it reduced the time spent on processes and additional checks and controls, while decreasing communication errors to almost zero.
- Products:** Power Automate, Power Platform
